

6G4SOCIETY

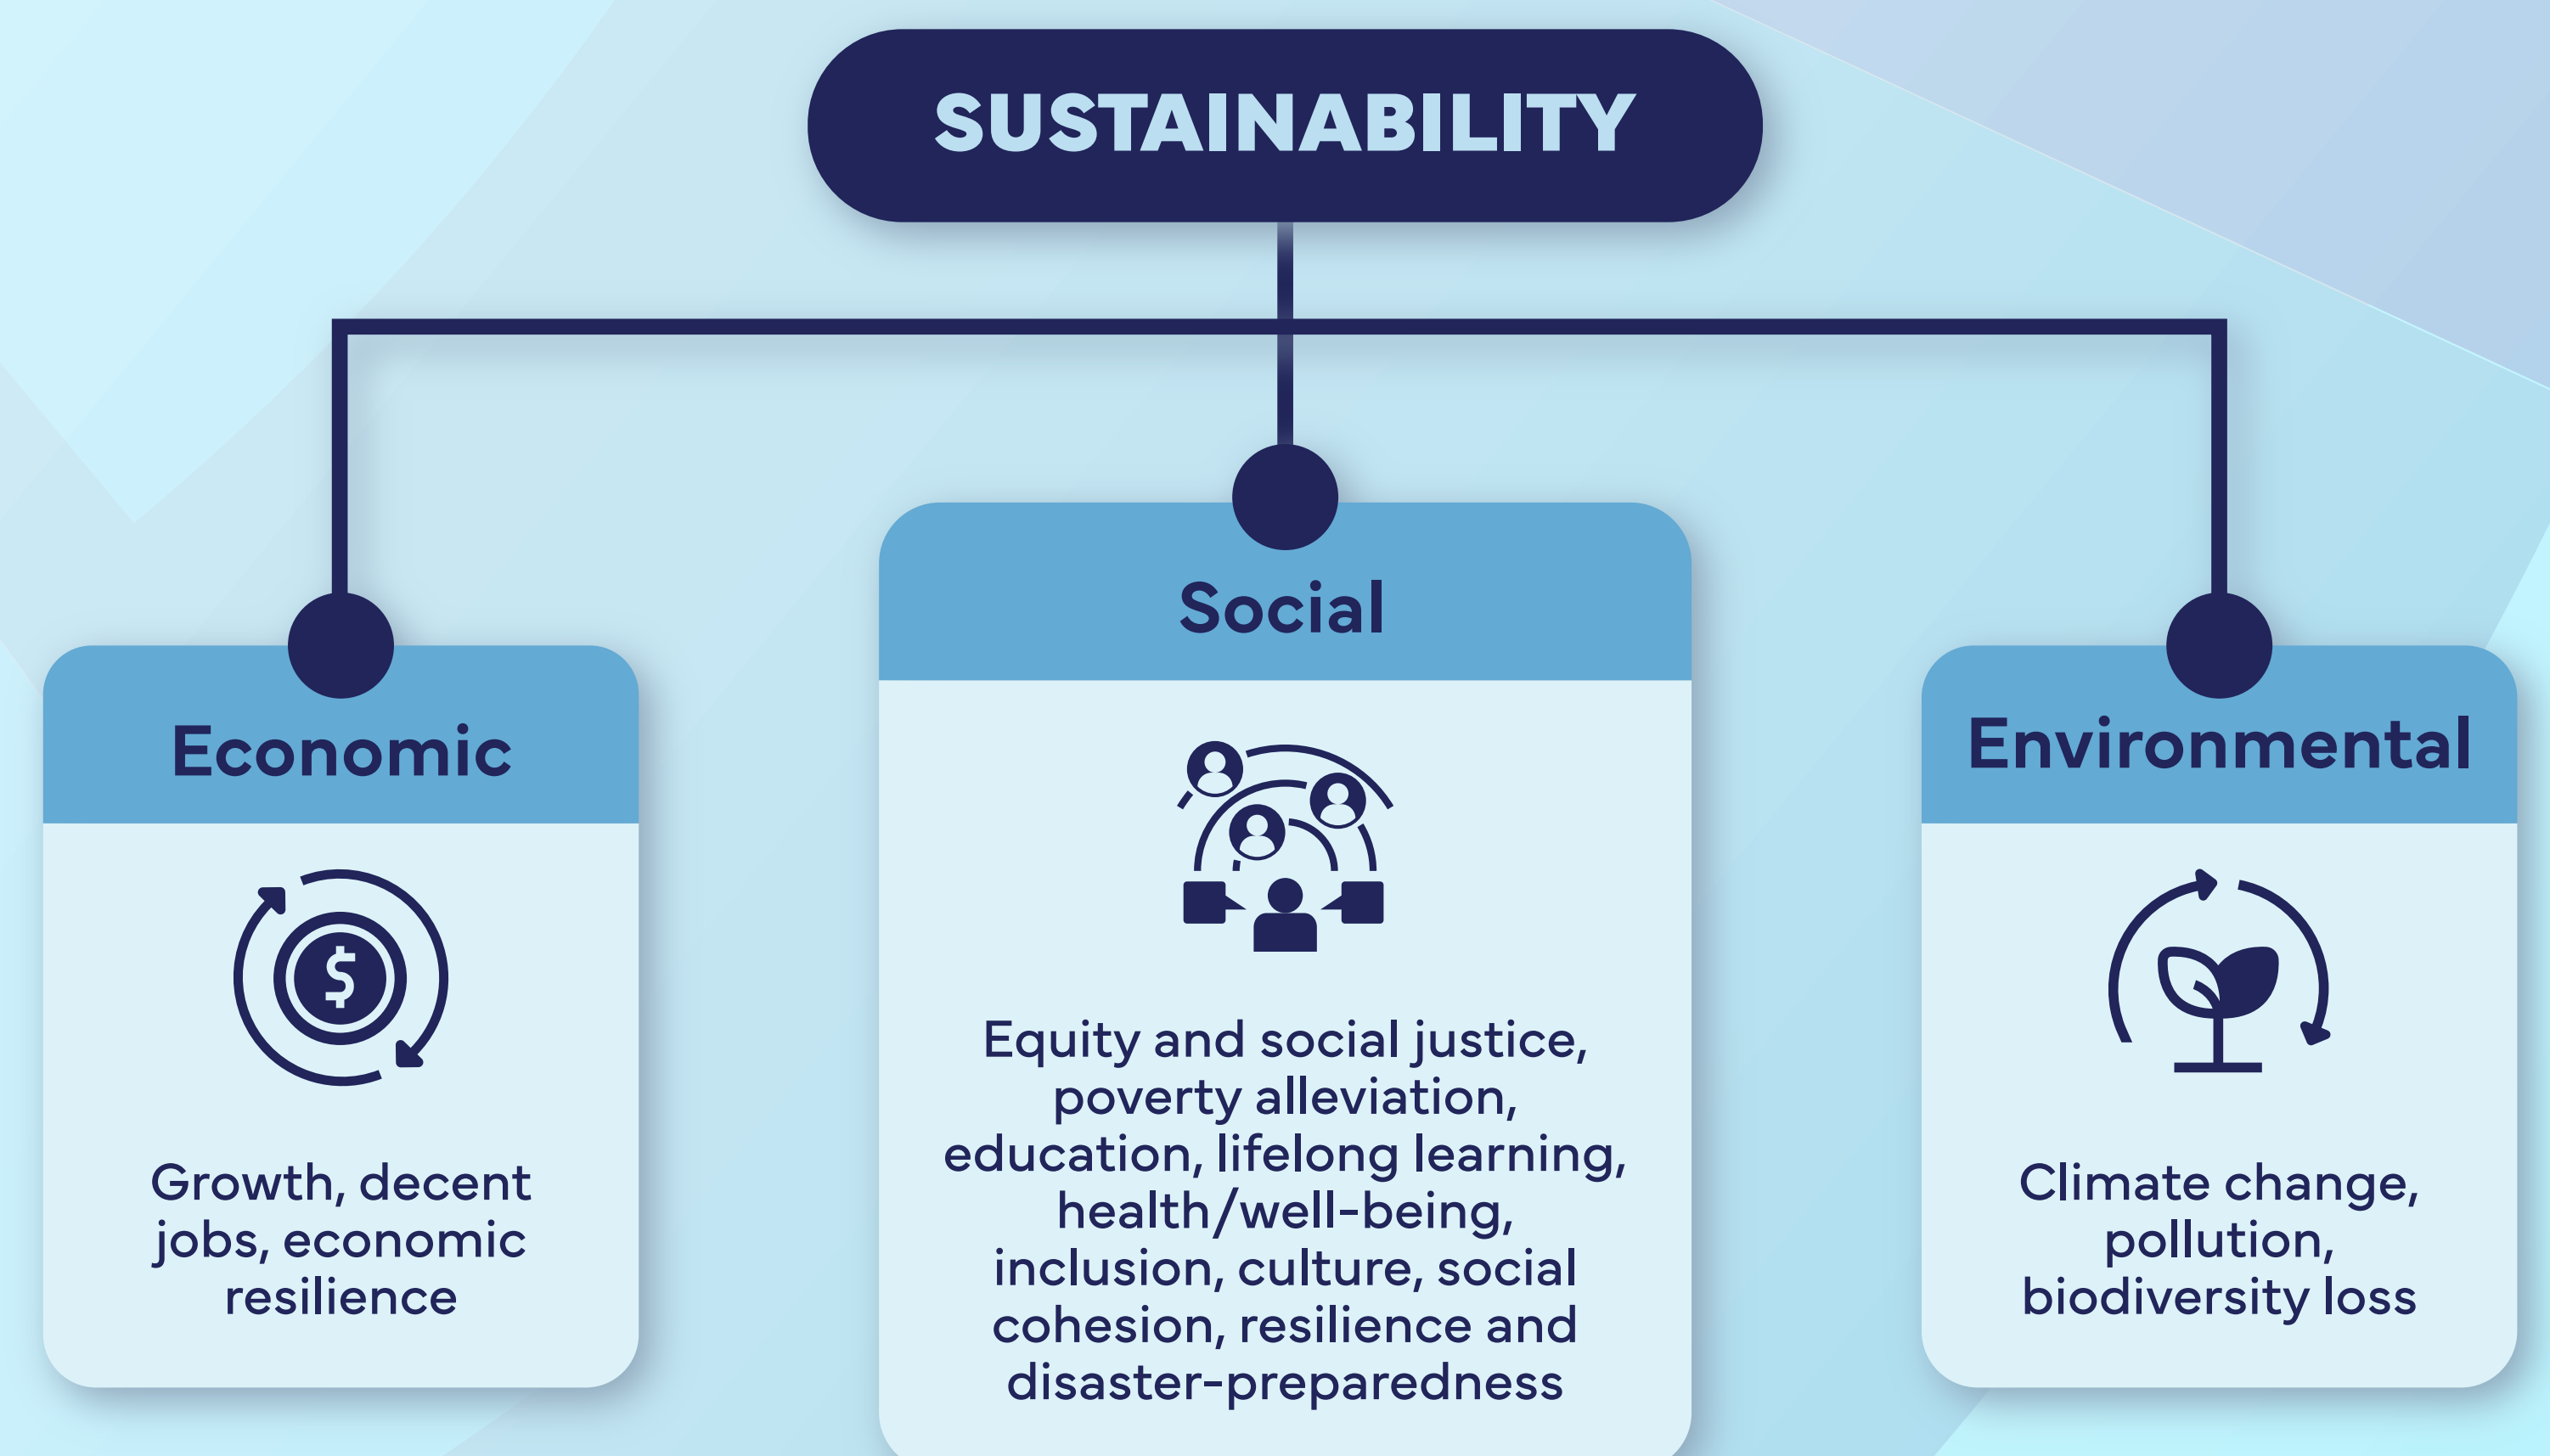

Towards a sustainable and socially accepted 6G for society

Visit 6g4society.eu

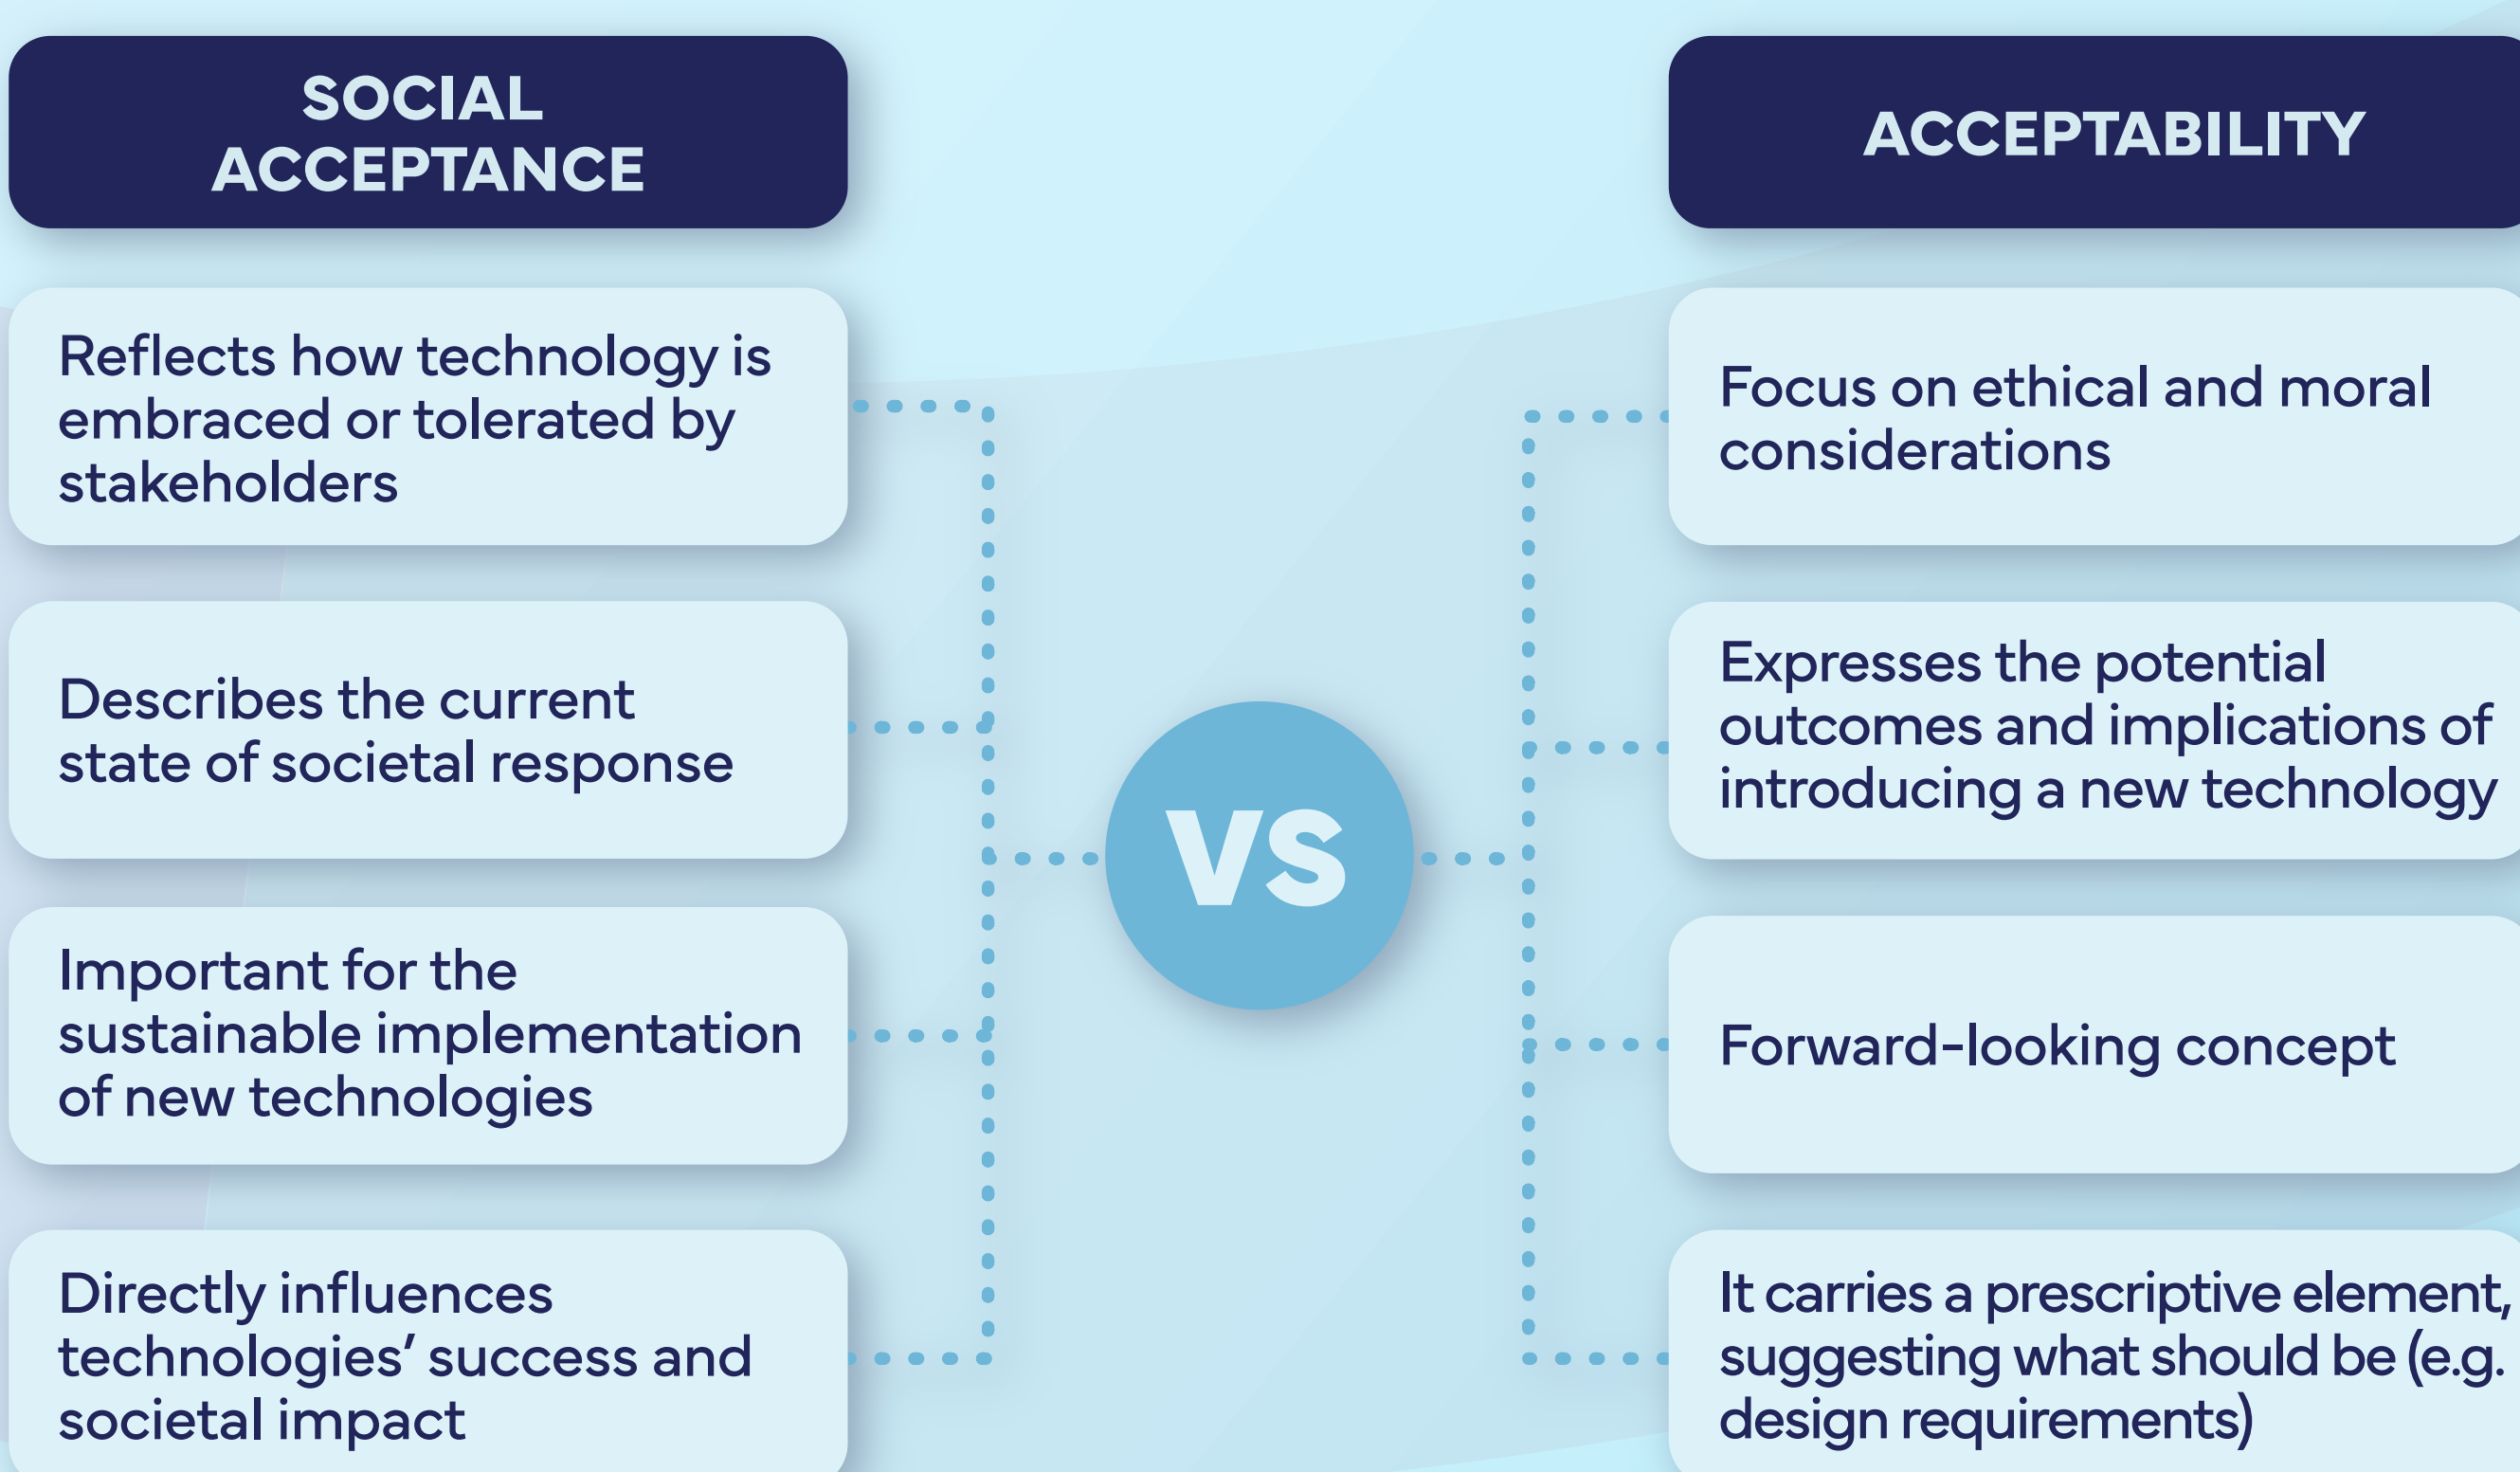

6G4Society aims to ensure that societal and sustainable values are properly embedded into the development of 6G technology, bringing a sociological perspective to technological development.

A Holistic Approach to Connectivity

As 6G enters its early development phase, we have a rare chance to integrate social, economic, and environmental sustainability into its foundation. This multidisciplinary approach requires collaboration among researchers, policymakers, industry experts, and community representatives to ensure technology development aligns with broader societal goals and values.

Acceptance vs. Acceptability

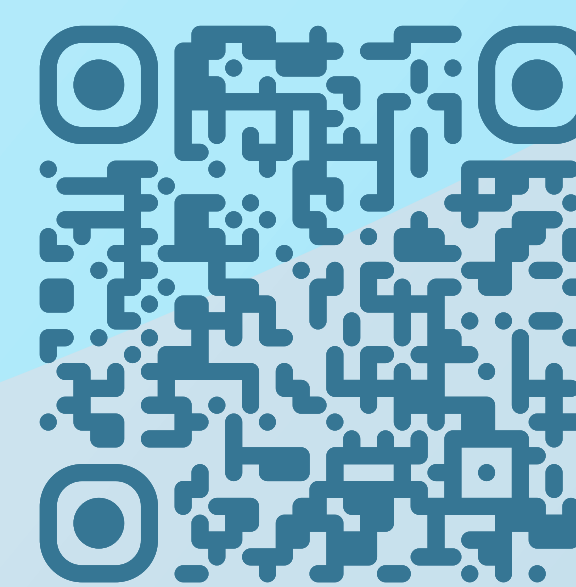

Key Value Indicators

A Roadmap for Responsible Development

The Path Forward

- Develop 6G with a human-centred innovation approach.
- Balance corporate success with societal and environmental well-being.
- Shape a connected future that is green, inclusive, and equitable for all.

Have your say on the future of connectivity
